

Tensor Engineering – <http://www.tensorengr.com/>, <http://www.tensorex.net/>, et al.
Privacy Policy

Tensor Engineering collects some personally identifiable information on its website. This document discloses Tensor Engineering's privacy policy.

The following information is collected from each and every visitor to the site:

- IP Address
- Geographic Region
- Browser Type and Version
- Computer Operating System

We collect this information largely only because most web browsers by default will send it to us. We do not require this information to be submitted to peruse our website; when such information is sent, we store it in a log file for later analysis. None of the aforementioned information is sold or traded to any third party organization unless explicitly requested by the user. This information is generally not personally identifiable.

The following information is collected from visitors who log-in to the Client Area or have an already-established relationship with Tensor Engineering and have used the site for project-related purposes in the past:

- First name
- Last name
- Company (and related company information)
- E-Mail Address

Tensor Engineering dislikes spam as much as everybody else. We do not sell, trade, rent, lease, or otherwise distribute any of the personally identifiable information previously mentioned, which is stored securely in our databases. Please see our Terms of Use, available alongside this document at the bottom of every Tensor Engineering page, for more information about the use of our databases.

Because some portions of this website may collect personally identifiable information, they should not be used by children under the age of thirteen. Due to the nature of Tensor Engineering's business, we do not at this time see a reason to accept COPPA forms in order to allow children to visit our site. Please note that our "Portfolio" section is not among this category, and is available to any and all visitors who would like to learn more about the bridges on which we have worked.

This document, along with all Tensor Engineering web content, is © 2005 Tensor Engineering, Inc. All rights reserved.
